Experienced Software Developer with 5+ years in backend and full-stack development, skilled in creating APIs, designing databases, and delivering scalable solutions. Looking to contribute my expertise to impactful projects and drive innovation.

WORK EXPERIENCE

SOFTWARE DEVELOPER (Fullstack) Engineer Philosophy Web Services Pvt. Ltd.

02/2021 - Present

Indore

Achievements/Tasks

- Contributed to a large-scale ongoing project by developing new features and functionalities.
- Delivered demos to stakeholders, understanding requirements and translating them into functional solutions.
- Designed and developed APIs based on project requirements for seamless integration.
- Collaborated with cross-functional teams to ensure smooth development and delivery processes.
- Architected and deployed a full-stack solution that integrated real-time data processing and intuitive UI enhancements; the application now supports over 1,000 daily active users, ensuring high reliability and performance.

SOFTWARE DEVELOPER (Fullstack) CyBuzzSC Infotech Pvt. Ltd

04/2020 - 02/2021

Nodia

Achievements/Tasks

- Maintained and enhanced a government-based website to manage media channels across India.
- Created new categories and organized channels based on parent-child relationships.
- Designed and developed database APIs to support website functionality and data flow.

SOFTWARE DEVELOPER (Backend) Buzz09 Pvt. Ltd

08/2019 - 02/2020

New Delhi

Achievements/Tasks

- Developed tools to draft itineraries for efficient trip planning.
- Designed and implemented RESTful APIs to support application functionality.
- Created and optimized database designs to ensure seamless data management and performance.

Bhopal

SKILLS

Nodejs

Mysql

React

React Native

Mongodb

Postman

Javascript

ExpressJs

Python

PERSONAL PROJECTS

Smart Attendance System (04/2016 - 06/2017)

- Developed an IoT-based Smart Attendance System using Raspberry Pi with face recognition, motion detection, and RFID card tapping. Created a web platform to manage attendance data in real-time, providing an intuitive interface for administrators to track attendance. The system logs attendance automatically via sensors, while the web app enables easy data retrieval, reporting, and management
